Skills

Agile

React

Angular

Java Script / Type Script

Unit and End to End Testing

Next Js and Remix Js (SSR)

React Native

Generative AI

Python

Node.js

JAVA/J2EE Spring Boot

SQL/ NO-SQL

CI/CD

Cloud Service

Summary

Results-oriented agile software engineer with 6+ years of experience in designing and developing software applications. hands-on experience in Front-End and Back-End technologies.

Experience in web-based enterprise/saas applications using JavaScript/Type script, React, React Native, Angular Version 2+ and NextJS, RemixJS Server side rendering with NodeJS, Unit and End-to-End testing along with graphql and cloud based services. Good understanding of Generative AI, LLM models, Function calling along with different features.

Progressive knowledge and understanding of backend technology in NodeJS with ExpressJS, Java (Spring boot) framework and Python. Implementing and understanding GitHub actions and CI/CD pipelines.

Education

Master of Science in Information System , University of Maryland Baltimore County (USA)

August 2014 - May 2016

Work Experience

Agile Software Engineer II, Priceline Technology, Mumbai

March 2022 - Present

- Developed and revamped internal applications of Priceline organization, likes, self-service, help page, cares application, into new customer care new platform with cutting edge technology.
- Validating customer support user interface requirements and implementing Priceline design system / styled components.
- Implementation of Penny chatbot with generative AI features like function calling.
- Developing new features, debugging current issues, deployment through CI/CD actions and harness.
- Managing and mentoring junior team members for task distribution and mentoring team members on daily tasks.
- Understanding and developing Micro services based framework, spring boot and SQL database.

- Implementing Remix JS server-side framework with different remix hooks along with React functional components, Type script, context API, and React Hooks.
- Integrating with React-testing library, Jest unit test cases with Mock service worker for unit testing functionality.
- Writing unit test cases in End-to-End Testing, Automation test cases in Cypress and Mocha.
- Understanding of continuous integration and continuous delivery pipeline using GitHub actions like code commit, code build, and code deployed services using GitHub actions.

Software Engineer II, Here Technologies / Accions Labs, Mumbai

April 2019 - August 2021

- I worked on different in-house products for developing maps by annotated signs, poles, and lane marking which are implemented using technology in React and Redux technology.
- Hands-on experience of creating react Class as well as functional components using React JS and passing data between props and state.
- Good understanding of react-lifecycle methods and Redux state management.
- Built backend service using NodeJS, MongoDB, and GraphQL independently.

Software Engineer, GEP private Solution, Mumbai

November 2017 - March 2019

- Worked on React as well as Angular applications using Typescript.
- Implementation of Angular 5.0 and Rect (class and functional) component with help of Typescript and JavaScript for the legacy applications.
- Working .NET technology for building REST API.
- Created WCF REST Services and web API which is used different bindings to make them available to front end applications.
- Having experience with angular unit-testing jasmine and karma for the Front-End application.
